IP Based / Network

Emergency Call Point

Model : PTSIPEMCPX501-1 / 2 (POE / NON-POE)

Outline

Emergency call point is designed for the purpose of triggering alarm in the event of emergency and utilizes LAN/WAN network for communication. Network Alarm Control Panel receives and displays the location that requires immediate attention and activates configured sirens as programmed.

Technical Specification

Product class	: IP Based
Housing	: Mild Steel
Protocol	: UDP
Operating Voltage	: 12-15V DC
Battery Backup	: No
Power over Ethernet	: Optional
Addressing	: Electronic
Configuration	: Web based
Interface	: Network Port
Customization	: Yes

Approvals

CE
