IP Based / Network
Manual
Call Point

Model : PTSIPMCP501-1 / 2 (POE / NON-POE)

Datasheet

Outline

Network IP call point is designed for the purpose of triggering alarm manually in the event of fire or any other emergency. Network Alarm Control Panel receives the emergency signal and activates configured sirens connected within the network.

Technical Specification

Product class	: IP Based
Housing	: Mild Steel
Protocol	: UDP
Operating Voltage	: 15-18V DC
Battery Backup	: No
Power over Ethernet	: Optional
Addressing	: Electronic
Connectivity	: Network Port
Configuration	: Web based

Compliance

CE-0086

EN-54-11
