

IP Based

Network I/O Module

Model : PTSIPIOX501

Datasheet

<http://www.pinetreesystems.com>

Outline

I/O Modules combine both input and output functions for interfacing external appliances and are the part of networking line of products. Output function control other external equipments such as sirens, horns, door locks, fire suppression systems, sprinkler valves etc with built-in dry contact relay. Input function is indented to monitor the status and interface external devices such as flow switches, temperature sensor, beam detector, flame detector etc. Data is transmitted through WAN/LAN and includes web-based interface for configuration.

Technical Specification

Product class	: IP Based
Housing	: Mild Steel
Protocol	: UDP/TCP IP
Operating Voltage	: 15V-18V DC - (External)
Power over Ethernet	: Optional
Configuration	: Web based
Contact Rating	: DC 24V 2A, 220V AC 5A
Connectivity	: Network Port

Approvals
