

Conventional 2 Zone Fire Alarm Control Panel

Model: PTSCFP02

Outline

PTCFP02 is a microprocessor based two zone conventional Fire Alarm Control panel that provides reliable fire signaling and flexible solution for small to medium installations that requires smoke detection and sprinkler supervision. PTC02 is an entry level panel and basically supervises 2 Zones and provides user friendly LED indications and controls

Specification

Product Class	: Conventional
Operating Voltage	: 230V AC \pm 10%-15% (nom)
Secondary Supply	: 12v 7/1.3ah Battery (2 nos)
Operating Voltage	: 30V DC \pm 1V
Battery charging current	: 500mA (max)
Charging voltage	: 28V \pm 0.5V
Relay contacts	: 2
Relay contact rating	: 2A @ 30V DC
Indications	: LED
Networking	: Yes
NAC Output	: Yes
Housing	: Mild Steel
Operating Temperature	: 0°C to +50°C
Operating Humidity	: <95% Non Condensed
