

Addressable Manual Call Point

Datasheet

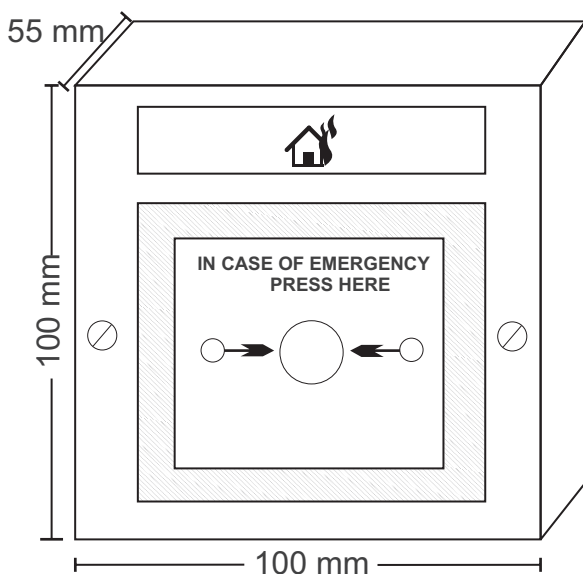

<http://www.pinetreesystems.com>

Outline

Manual call point is designed for the purpose of triggering alarm manually in the event of fire or any other emergency and are available in single or dual action models. Each device is tagged with a unique ID that speeds up the emergency personnel response time by pin-pointing the location of the alarm sources.

Mechanical Specifications

Technical Specification

Product Class	: Addressable
Type	: Resettable
Alarm Current	: 25mA
Operating Voltage	: 18-24V DC
Housing	: ABS
Alarm Output	: RED LED
Operating Temperature	: -10°C to +55°C
Operating Humidity	: <95% Non Condensed

Dimensions

Height	: 100 mm
Width	: 100 mm
Depth	: 55 mm
