

Wireless Emergency Sounder

Model: PTSWES-V1

Outline

PineTree's state-of-the-art technology provides wireless alarming devices that can be triggered and silenced in case of emergency from compatible activating devices like Wired/Wireless Emergency Manual call points and smart mobile applications.

Featuring a very loud alarm, the device also includes in-built battery backup. The range of the device can be extended as required by using Wireless Signal Extenders. Wireless Electronic Sounder is a perfect solution for your wireless emergency notification requirement.
