Outline

Addressable Wireless Fire Alarm Control Panel is the core component of the Fire Detection system. Our panel uses state of the art RF wireless communication technology for communication bundled with self test and supervisory features. PTS-eX Series of Wireless Addressable Fire Alarm Control panel is engineered for residential, commercial and industrial applications with features that minimize installation cost and time. Touch Screen TFT further simplifies the system operation, installation and maintenance. They offer the design flexibility, expansion compatibility and operation reliability for large scale installations.

Technical Specification

Product Class	: Wireless - Addressable
Operating Voltage	: 230V AC \pm 10%-15% (nom)
Secondary Supply	: 2 x 1.3ah Battery
Housing	: Mild Steel
Operating Temperature	: -10°C to +55°C
Operating Humidity	: <95% Non Condensed
Addressing Capacity	: 250 devices per node
Interface	: 5" Touch Screen
