Outline

Wireless Addressable Hooter is designed to provide alarm notification signals in the event of Fire / Emergency reported to the Control panel from Wireless Smoke Detector/Manual Call Points. Featuring a very loud alarm, the device also includes in-built battery backup. The signal strength of the device can be extended further using Wireless Signal Extenders.

Technical Specification

Product Class	: Wireless - Addressable
Operating Voltage	: 15-18V DC
Secondary Supply	: 12V 1.3Ah Battery x 1 no
Audible Range	: 80-90dB @ 1 meter
Housing	: Mild Steel
Operating Temperature	: -10°C to +55°C
Operating Humidity	: <95% Non Condensed
Addressing Method	: Electronic
